Professional Summary

UI/UX Designer and Informatics graduate with a strong passion for creating intuitive, user-centered digital products that solve real-world problems. Experienced in designing web and mobile interfaces through user research, user flows, wireframing, prototyping, and high-fidelity design using Figma. Supported by a solid foundation in software engineering and front-end technologies, enabling effective collaboration with cross-functional teams to transform business requirements into impactful digital experiences. Highly adaptable, detail-oriented, and committed to continuous learning and delivering high-quality design solutions.

Education

Syiah Kuala University Banda Aceh, Aceh
Bachelor of Informatics (GPA: 3.25/4.00) Feb 2026

- Relevant Coursework: Human-Computer Interaction, Software Engineering, Web Development, Mobile Application Development, User Experience Design, Database Systems.
- Bachelor's Thesis: Designed and developed a web-based mobile phone service booking system for Bukhari Service Center using Next.js, TypeScript, PostgreSQL, Prisma ORM, and Progressive Web App (PWA) technologies to streamline service booking, spare part management, and customer notifications.

Professional Experience

Aceh Provincial Social Affairs Office Banda Aceh, Aceh
UI/UX Design Intern Jul 2024 – Sep 2024

- Conducted UI/UX design for the Social Welfare Services (PPKS) information system from concept to high-fidelity prototype using Figma.
- Created user flows, wireframes, interactive prototypes, and design systems to ensure design consistency across the application.
- Collaborated with stakeholders to transform business requirements into user-centered digital solutions.
- Improved application usability by applying visual hierarchy, accessibility principles, and modern UI patterns.

Bangkit Academy led By Google, GoTo, and Traveloka Online
Mobile Development Cohort Feb 2024 – Jul 2024

- Selected as one of Indonesia's technology talent participants in Bangkit Academy 2024, a prestigious program led by Google, GoTo, and Traveloka.
- Collaborated with Mobile Development, Machine Learning, and Cloud Computing cohorts to build a weather-based crop planting prediction application.
- Applied user-centered design principles to improve usability and user experience throughout the product development lifecycle.
- Participated in Agile development, sprint planning, code reviews, and cross-functional collaboration.

Freelance Graphic Designer Banda Aceh, Aceh
Freelance 2023 - Present

- Delivered over 50 graphic and digital design projects for clients across various industries, including social media campaigns, marketing materials, presentations, banners, and promotional assets.
- Collaborated directly with clients to identify project objectives and transform ideas into visually engaging designs.
- Maintained consistent branding while meeting project deadlines and client expectations.

Organizational Experience

Head of Communication and Information Department (KOMINFO) Banda Aceh, Aceh
Student Executive Board, Faculty of Mathematics and Natural Sciences, Syiah Kuala University 2023 – 2024

- Led a team responsible for managing the organization's visual communication strategy.
- Coordinated publication workflows and cross-department collaboration to improve communication effectiveness.
- Directed digital content planning and maintained consistent branding across social media platforms.

Communication, Information and Creativity Division (KOMINKRAF)

Informatics Student Association, Syiah Kuala University

Banda Aceh, Aceh

2022 – 2023

- Designed digital promotional materials including posters, banners, Instagram content, and event publications.
- Produced engaging visual content to increase student participation and strengthen organizational branding.

Inter-Organization Relations Division (HUAL)

Student Executive Board, Faculty of Mathematics and Natural Sciences, Syiah Kuala University

Banda Aceh, Aceh

2022

- Established and maintained partnerships with internal and external organizations.
- Coordinated communication for collaborative academic and student activities.

Projek

Bukhari Service Center

Full Stack Web Application

- Designed and developed a full-stack web application that digitized the mobile phone service booking process, making service requests faster and more efficient for customers.
- Created an intuitive and responsive user interface using Figma, then implemented it with Next.js and TypeScript while ensuring a seamless user experience across devices.
- Built and managed the backend using PostgreSQL and Prisma ORM, including service booking, repair tracking, spare parts management, and automated email notifications.
- Implemented Progressive Web App (PWA) features to provide a fast, reliable, and app-like experience on both desktop and mobile devices.

PPKS Information System

UI/UX Design Project

- Designed a user-centered interface for the Social Welfare Services (PPKS) Information System, improving usability through structured user flows, wireframes, and high-fidelity prototypes in Figma.
- Translated stakeholder requirements and business processes into intuitive digital experiences by applying usability principles, visual hierarchy, and accessibility best practices.
- Developed a consistent design system and reusable UI components to maintain visual consistency and simplify future application development.
- Collaborated with stakeholders to align design with user needs.

BooTani

Weather-Based Crop Planting Prediction Mobile Application

- Collaborated with multidisciplinary teams to design and develop a mobile application that predicts optimal planting seasons using weather data and a user-centered design approach.
- Designed user flows, wireframes, and interactive prototypes that simplified complex agricultural information into an intuitive and accessible mobile experience.
- Worked closely with Mobile Development, Machine Learning, and Cloud Computing teams using Agile methodologies to deliver an integrated digital product.
- Contributed to product discussions, usability improvements, and interface refinement to enhance the overall user experience and application effectiveness.

Technical Skill

UI/UX Design

- Figma, User Research, User Flow, Wireframing, Interactive Prototyping, Design Systems, Information Architecture, Responsive Design, Visual Design, dan Usability Testing.

Front-End Development

- HTML, CSS, JavaScript, TypeScript, Next.js, and Tailwind CSS.

Back-End & Database

- Node.js, PostgreSQL, Prisma ORM, and REST API.

Design & Productivity Tools

- Figma, Canva, Adobe Photoshop, Microsoft Office (Word, Excel, PowerPoint), and CapCut.

Personal Skill

- Effective Communication, Team Collaboration, Leadership, Critical Thinking, Problem Solving, Time Management, Adaptability, Attention to Detail, Fast Learner, Presentation Skills, Project Coordination, dan Stakeholder Communication.
